Oko

AN ELEGANT LOUNGE CHAIR THAT TAKES INSPIRATION
FROM THE SOFT CURVES OF A COCOON

Design by LucidiPevere

Oko is an elegant lounge chair inspired by the curves of a cocoon. The pillowy seat and backrest invite you to sink in, while a rigid back panel supports the shape and doubles as a decorative element. Sophisticated material combinations, including fabric, leather, and wood (for the back panel), enhance the design's versatility.

Oko lends a residential feel to corporate and hospitality environments, including lobbies, hotels, and executive suites. Oko was designed with sustainability in mind. The seat and back cushions are engineered to be easily removed and reupholstered, making it easy to keep the chair looking its best for years to come.

"We were inspired by the soft, protective embrace of a cocoon. We wanted to create a chair that would offer the same sense of comfort and security, while also being compact and easy to move around."

Paolo Lucidi, LucidiPevere

Luna

BANQUETTE SEATING THAT CAN BE CUSTOMIZED BY
THE INCH FOR PERFECT SYMMETRY AND FIT

A Stylex Design by Anthony Land

Luna is banquette seating specified by the inch, allowing for symmetry and fit in even the most unusually sized spaces. Segments range from 25" to 60"; they can be running or stand alone, ends open or finished with a half-moon-shaped arm. Luna's rounded edges and generous sit ergonomically support the body. The seat's upholstery and base options tailor it to a diversity of office and hospitality environments.

Designed for seamless integration with Still screens, the Luna collection, available with a high or low back, also includes a planter and trio of accessory tables. Luna is available with a black laminate plinth base or cast aluminum legs in a choice of 26 powder coats. Accessories include a tray table, tablet arm, and wireless charging tray.

“With Luna, we took our in-house upholstery expertise and created a custom experience in a standard product. The result is a banquette that is specified by the inch, allowing it to seamlessly fit into any size space.”

Anthony Land, Stylex Design Director

Ease Up

THE IDEAL STACKING CHAIR FOR CONFERENCE ROOMS,
CAFES, OR OVERFLOW SEATING

Design by Martin Ballendat

Experience the perfect combination of sustainability, comfort, and affordability with Ease Up. Crafted from a single piece of high-density polypropylene, this chair boasts a seamless design with no visible connection points between its supple back, seat pan, and c-shaped legs. Adding a touch of texture and contrast, an upholstered seat pad enhances both the aesthetics and comfort of the chair.

Practicality is at the forefront of Ease Up's design. It can be ganged and stores compactly, stacking up to twelve chairs high and is available with a dolly for convenient transport. These features make it an excellent choice for cafeterias, conference centers, and any space where additional seating may be required.

“Ease Up was inspired by our desire to create a best-in-class sustainable stacking chair for conference settings and cafes that is both stylish and affordable.”

Bruce Golden, Stylex CEO

Umo

SCULPTURAL TABLES THAT ADD VISUAL WARMTH TO A SPACE

A Stylex Design by Brandon Walker

Umo is a collection of solid wood tables that combine geometry and form to create sculptural objects that add utility and visual warmth to any space. The collection has been expanded to include a coffee table, which complements the existing side tables in oak, maple, walnut, and opaque black.

Cove

THE LOUNGE CHAIR THAT OFFERS A PERFECT SPOT TO UNWIND

A Stylex Design by Brandon Walker

Cove lounge chairs are comfortable, visually striking, and functional pieces of furniture that are perfect for personal meetings, focused work, or simply relaxing. They are available in a low-back and high-back version, and have been updated to offer a new 4-leg wood base for both the chair and ottoman.

Yoom

AN ENDLESSLY FLEXIBLE MODULAR LOUNGE COLLECTION
THAT JUST GOT MORE VERSATILE

A Stylex Design by Anthony Land

The Yoom lounge collection is defined by its soft, simple forms and unrestricted configurability. Carefully considered proportions and upholstery construction ensure that Yoom offers a highly comfortable sit. The pieces' interplay of materials and shapes adds texture and visual sophistication to contract settings.

The Yoom line extension includes half- and quarter-round seating components, two sizes of integrated tables, and a new arm width. These additions are available on both Yoom and Yoom Soft. Feet can be fitted with plastic glides or casters, and power can be integrated into the base for a place to plug in.

YOOM

“Yoom is our most flexible modular lounge collection so we decided to take it up a notch by incorporating curves that not only enhance its aesthetic appeal, but also encourage more fluid circulation within a space.”

Anthony Land, Stylex Design Director
